

Church-Day Sheet

Everything you need to know, carry, and say. Updated July 5, 2026.

THE 60-SECOND CHECK BEFORE YOU LEAVE

1. **Your Android phone:** fully close the MBM app, open it, close it, open it again (updates arrive on the first open, apply on the second). Then confirm: no flash of the small disclaimer at the start of the opening story; the clock icon on Talk About It looks whole; opening Talk About It shows the new "Two ways to talk here" card instead of AI being on by default.
2. **Any iPhone you can borrow:** scan the QR on sheet #4. It should open the App Store page for Milk Before Meat and install like any normal app.

WHAT IS TRUE RIGHT NOW

- **iPhone: LIVE on the public App Store** — free, worldwide. The direct link and the QR on sheet #4 work now. One caveat: **typing "Milk Before Meat" into App Store search may not find it for another day or two** (Apple's search index lags new apps). So tell iPhone people: **use the QR code or the website — don't search.**
- **Android: invite-only testing.** An Android person emails admin@milkb4meat.org with their Google account email, and you send the invite. Every Android signup also counts toward the 15 testers Google requires before Android can go public — so collect them gladly.
- **The website milkb4meat.org** is live, current, and safe to point anyone to. The roadmap page there matches the printed one.

WHAT TO PRINT TONIGHT (ALL CURRENT AS OF TODAY)

- **A stack of #1** — Come-and-See brochure. The everyday handout.
- **Several each of #2 and #4** — they travel together: "here's why, here's how."
- **One or two of #3** — for the bishop or leader conversation.
- **A few of #5** — the roadmap, **reprint this one; the old copies say "waiting on Apple" and that's no longer true.** #4 printed on/after July 4 is current; older #4 copies show TestFlight and are obsolete.

WHAT TO SAY IN ONE BREATH

"I built an app that shares the gospel the way the Savior taught — story first, meeting people where they are. It's free on the iPhone App Store right now, and I'd love your honest eyes on it — especially the hard-to-hear feedback."

If you're asking for counsel first (a good instinct): bring sheet #3, and say you're not asking for an endorsement — you're asking a shepherd to look at a tool one of his members built, before you share it any wider. Let him keep the sheet.

IF SOMETHING GOES WRONG IN THE MOMENT

- QR won't scan → have them type **milkb4meat.org**; the site's iPhone button goes to the same App Store page.
- Someone finds a bug → thank them, write it down, and tell them that's exactly what this phase is for. You are never the one who has to fix it — just carry it home.
- Hard doctrinal questions about the app → "It never replaces a person. A real human is always one tap away inside it, and it tells people plainly what it is."

STILL YOURS TO DO (NOT URGENT FOR TOMORROW)

- Set a monthly spend cap at **console.anthropic.com** (5 minutes, protects your card).
- Keep gathering Android testers toward Google's required 15-person, 14-day test.
